Section 1 - Scope

Where a new gate or barrier is installed on a fire access roadway, it shall be authorized by the Fire Department. Approval of automated gates or barriers is subject to the owner accepting responsibility for any future programming requirements by the authority having jurisdiction (AHJ).

Section 2 - Permit

A permit issued by the fire AHJ to design and install any secured access gate system shall be obtained and approved in writing prior to installation. The gate permit may be revoked and the gate locked in the open position for any cause determined by the AHJ to be in the interest of public safety.

Automated gates or barriers will require the installation of a Click2Enter® system at your building when you install automatic vehicle access gates. The system will house gate transmitter/receiver to allow for fire department and emergency services access. Information on programming may be obtained directly from Click2Enter® or their licensed authorized representatives. All systems are subject to field testing prior to approval and/or operation. Please contact our office with a minimum of 48 hours’ notice to schedule field testing.

Section 3 - Click2Enter® Ordering Procedure

Contact Click2Enter® directly through the contact information provided below:

Click2Enter, Inc. - Corporate Offices  
P.O. Box 174, Chromo, Colorado 81128
