1008.1* The means of egress, including exit discharge, shall be illuminated at all times the building space served by the egress is occupied.

1008.2.1* Egress illumination level shall not be less than 1 foot candle (11 lux) at the walking surface.

Exception- auditoriums, theaters, concert or opera halls and similar, illumination at the walking surface is permitted to be reduced during performances to not less than 0.2 foot-candle (2.15 lux), provided that the required illumination is automatically restored upon activation of a premises’ fire alarm system where such system is provided.

1008.3 The power supply for means of egress illumination shall normally be provided by the premises’ electrical supply.

Confirm emergency lighting for the following:

_____ 1. Aisles & unenclosed egress stairways in rooms and spaces requiring 2 or more means of egress.
_____ 2. Corridors, interior exit stairways & ramps & exit passageways in buildings required to have 2 or more exits.
_____ 3. Exterior egress components at other than their levels of discharge until exit discharge are complete.
_____ 4. Interior exit discharge elements in buildings required to have 2 or more exits.
_____ 5. Exterior landings for exit discharge doorways in buildings required to have 2 or more exits.

Additionally, ensure the following rooms have an emergency electrical system:

_____ Electrical equipment rooms
_____ Fire command centers
_____ Fire pump rooms
_____ Generator rooms
_____ Public restrooms larger than 300 square feet
Emergency power system shall provide power for not less than 90 minutes and shall consist of storage batteries, unit equipment or an on-site generator. The installation of the emergency power system shall be as per Section 604.

1008.3.5 Emergency lighting facilities shall be arranged to provide initial illumination that is at least an average of 1 foot candle (11 lux) and a minimum at any point of 0.1 foot candle (1 lux) measured along the path of egress at floor level. Illumination levels shall be permitted to decline to 0.6 foot candle (6 lux) average and a minimum at any point of 0.1 foot candle (1 lux) at any point of 0.06 foot candle (0.6 lux) at the end of duration. A maximum to minimum illumination uniformity ratio of 40 to 1 shall not be exceeded.

California Fire Code 2016 ed.

I certify under penalty of perjury that the company I represent has tested the emergency lighting at the above listed address DOES ___ or DOES NOT ___ it meets all applicable codes and standards including the Life safety code sections listed above.
